

How to use PFI Search

Click on the **Search** icon to activate the Quick Search

Choose whether you want to search across **news** or **deals** and enter a keyword or phrase in the box.

Your results are shown in the window.

You can also perform an [Advanced Search](#).

Start typing your search criteria. Search results will be displayed by phrase and asset class, along with keyword suggestions as you type.

Keep typing to further filter your results or select one of the options to proceed.

The screenshot displays the 'ADVANCED NEWS SEARCH' interface. On the left, there is a sidebar with filter categories: 'Headline', 'FILTERS', 'SECTOR', 'REGION / COUNTRY', 'ASSET TYPE', and 'PEOPLE AND MARKETS'. The 'Headline' dropdown is open, showing the search term 'Infra' with a blue arrow pointing to it. Below the search term, the interface is divided into three sections: 'PHRASE' with the suggestion 'Infra', 'ASSET CLASS' with 'Project Finance', and 'KEYWORD SUGGESTIONS' with 'infrared', 'infracfund', 'infraestructura', 'infravia', and 'infrastructural'. At the bottom of the interface, there is a table with columns for 'Date' and 'News Headline', with the first row showing '04 Jun 2016' and 'EMEA: Germany: Esquistoso de...'.
